LOGNOTE -- Chief, Operations Group, 14 June 1984

1. [] Following from this morning's staff meeting:

25X1

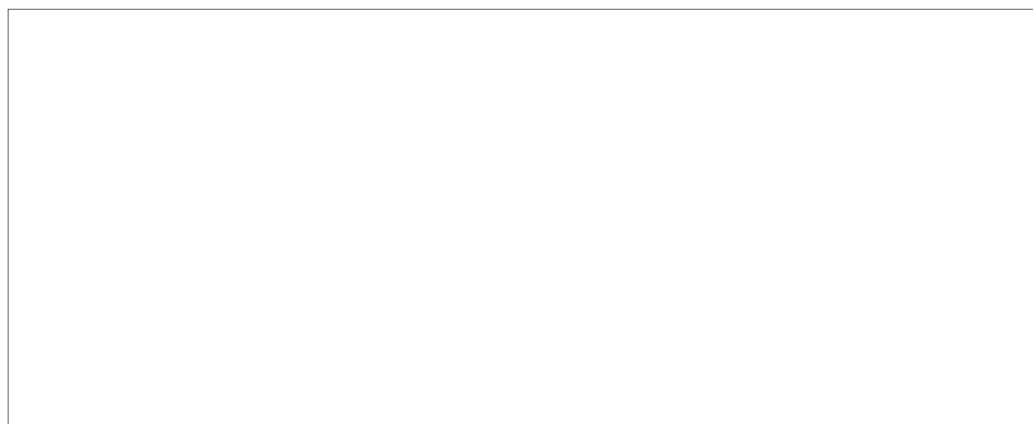

- Security just completed its security review of JPRS. Their first recommendation is to move; their second recommendation is also to move.

- DD/S&T has set up a Board of Directors to administer DD/S&T (debate the insoluble problems). It is composed of the Office Directors, no staff people.

- John McMahon briefed a group of visiting college professors and told them the Agency had no information that the KGB was involved in the assassination attempt on the Pope. He also said that the Senate and House had been heavily briefed on mining of the harbors, the first time as early as last October.

- This year's annual review will be early, in late August.

- Any recruiting pamphlets must be cleared by O/Pers and Public Affairs.

25X1

- DDI has abolished the eight hour "give away" rule for directed overtime for professionals. We will try to get S&T to adopt a similar policy.

- [] the S&T secretary, has been meeting with Directorate secretaries. She plans to come back to FBIS to look into complaints in DRD Publications Staff.

25X1

- The FAT team wants a health room. C/AS says if there is to be one it should be for everyone in Key. He will liaise with the other offices.

SECRET

25X1

SECRET

25X1

- We are now permitted to rehire annuitants at higher salaries than they received when on duty.

- DDA has started its first training class for guards to take over from GSA.

- [] formerly of IG Staff, is looking into the question of applicants and will visit FBIS. (I talked with him about this a year ago, but can't see that much progress has been made--it's still far too slow.)

25X1

- The EXCOM meets next week on ROSET, INTERNET, AGFILE.

- S&T wants someone to take part in new building planning full time, about the GS-11 level. I said I thought the person ought to come from OTS or ODE, not FBIS.

- The job of Chief of the Analysis Group in the Comptroller's office is coming vacant. They are looking for a "fast track" GS-15. It is an SIS position. People who have served in this post leave it universally hated; it's the nature of the job.

- The space in Ames Building seems about 100 percent certain. DD/FBIS feels we need to establish a presence there ASAP. The plan is still to move ED into Ames. The space is roughly double ED's present space, 2,960 square feet. This would enable us to relocate MOD to the sixth floor and move ahead with setting up a real climate-controlled computer room like most organizations have.

- The Agency may take over Key parking on 1 July, but we won't know how the spaces are to be redistributed until August. We hope D/FBIS will be authorized to allocate the spaces. Kelly Girl space does not count against the FBIS totals.

- The 1986 capabilities statement is due in late July. E&PS will circulate last year's version. There usually are not a great many changes, though we may have some for Latin America this time.
